

# A BRIEF HISTORY OF EDALE

**Edale** are British manufacturers and engineers of quality world-class tailor-made flexographic printing and converting solutions for the packaging industry.

## TODAY

Fast forward **11 years**, we have learnt a lot and innovated and adapted our business to ensure we keep moving forward through continued investment in R&D. We partner with leading companies, including AGFA, ABG, Canon, Fujifilm and FFEI.

## 2020

This year marks a significant milestone as we celebrate Edales' **75th Anniversary**. We are proud to be a British manufacturer of sophisticated printing machines which are exported **all over the world**.

## 2009

**Edale** moved from **Romsey** to a purpose built 60,000 ft manufacturing facility in Hampshire, UK

## 1991

A further acquisition was made. **PB&E Engineering**, manufacturing of hot foil stamping machines.

## 1990

**Edale** acquired **Fabrint**, a market leader in Flat Bed, multi colour web screen presses. During this time the **Bruder Henn** in Austria became key trading partners

## 1987

**Today's** Board of **Directors** assumed responsibility and re-established **Edale** as a leading manufacturer of printing & converting machines

## 1982

**Lonsdale** purchased **Hall Kelly**. In 1982 it was **acquired by Edale**. Edale grew substantially with modular as well as stacker, flexo presses, screen machines and a range of specials for the medical market.

## 1961

The Company was brought by **Lonsdale** who sub-contracted the manufacture of flexo presses for **Hall Kelly**.

## 1950

Company start to developed its own **label printing machines**. hundreds were sold all over the world.

## 1920

**The Company's origins** began as the engineering arm of British American Tobacco.
